## Ivan Illich: Yet Again Revisited

---

Friday, 19 September 2014

10 of 10

This is a compilation of personal responses to quotes taken from Illich's ground-breaking work. This is not an academic piece with footnoting and a bibliography. It is reflective, making comments on the implications of what Illich proposed back in 1970. Many of the ideas have been fleshed out, and they are being applied to real educational contexts. However, I hope that some of these reflections are helpful to some people newly discovering the work of Ivan Illich. In his latter years Illich lost favour with many of his earlier followers. Be that as it may, many of his earlier ideas were good ideas, and deserve to be revisited from time-to-time.

## Introduction

Ivan Illich's, (1970). *Deschooling Society*. Cuernavaca, Mexico: CIDOC, is freely downloadable from: <http://www.preservenet.com/theory/illich/Deschooling/intro.html>  
The booklet is not very long, but is compact in its ideas. The following set of quotations were lifted from the above text, and the page numbers relate to this edition of his work. These comments appear as blogs at my blog site: <http://lanceaboxeducationresearch.com/>  
They have been edited slightly, but most read as they were composed for the blog site.

The ideas of Ivan Illich were a jumping-off point for the ideas in my PhD dissertation which can be read at:  
[https://www.academia.edu/7970729/Deschooling\\_Uncchooling\\_Australian\\_Biblical\\_Christian\\_Education](https://www.academia.edu/7970729/Deschooling_Uncchooling_Australian_Biblical_Christian_Education)

**Home-Based Education Is Education In Community, Not In Isolation**

*p. xix "Universal education through schooling is not feasible. It would be no more feasible if it were attempted by means of alternative institutions built on the style of present schools. Neither new attitudes of teachers toward their pupils nor the proliferation of educational hardware or software (in classroom or bedroom), nor finally the attempt to expand the pedagogue's responsibility until it engulfs his pupils' lifetimes will deliver universal education. The current search for new educational funnels must be reversed into the search for their institutional inverse: educational webs which heighten the opportunity for each one to transform each moment of his living into one of learning, sharing, and caring."*

doctorate. A doctorate is really self -directed learning, although M o may have been more than most. They gave me total freedom to shape my project and choose the world and data that I used, with very little entry of my supervisor or in fact any other person. Illich's section on "the ritualization of progress" made me consider how much I had to win this freedom by exceeding the previous 18 years of compulsory educational instruction and the taking of exits. Then, as soon as this right to learn alone, it was expected that I turn around and teach others, controlling their learning and establishing the exits. Suddenly it seemed very cyclic, reproducing the importance of instruction. As Illich says: "In school we are taught that valuable learning is the result of assistance; that the value of learning increases with the amount of entry; and, finally, that this value can be measured and documenting by qualifications and certificates ... This transfer of responsibility of only institutions guarantees social regulation, especially once it has been accepted as an obligation. Then, the rebels against Alma Mater often "do it in their faculty instead of growing in the courage to infect others with their personal teach slide a critics of the free market economy, for example) ensuring that our students obtain good results of exits. The most gratifying students for Teaching have not completely internalized the concept of education as simply a means to obtain qualifications, but they also appreciate learning by themselves. However, space in institutions y y n isrevid rop rednerpa ed eturfsid im ertne olucn  nu etsixe etnemelbaborp euq ed atneuc yod em ,ohceh eD .odicuder y o± euqep res ecerap senem; xe ne odartnec on ejazidnerpa le arap All about the curriculum and my ability to obtain good exam brands. If all my energy and time had been required to obtain decent exams, I could not learn more about that and I would probably not wanted to do it. This seems deeply unfair and illegal: being rewarded by the examination ability to not have to use more exam skills! Instead, the right to try to transmit exam skills to a new generation has been gained. I doubt that it is particularly  til in any case, in any case, since it does not only do the exits are relatively manageable for me in comparison with others. Apart from the fact that exam skills have little or no relevance in the world of work, much less the rest of life. I agree with Illich that the practical (writing, for example) tests are more  ostiles for the suitability of candidates to obtain a job that the results of the exam. In fact, such evidence seems quite common, but only if the candidates have also approved the obsques of the exam results. While I am on the general issue of superior education, I must mention the excellent ilich animisis of highway systems such as "â,-" False Public Utilities ". If I would meet this before I worked on my thesis , since it is very good: the road system is not available similarly for someone who simply learns to drive. There are telephone and postcards to serve those who wish to use them [they have not been privatized now!] , While the road system mainly serves as an accessory for the private automvile. The former are [once] true public services, while the second is a public service for automossers, trucks and buses. There are public services in of communication between men; Roads, like other institutions on the right, exist for the sake of a product. Car manufacturers, we have already observed, simultaneously produce both automobiles and demand for cars. They also produce demand for roads, bridges and multilane oil fields. multilane. der atsE .sa av satnic ed atrefo aipma anu omoc  sa ,satomer saedla ne osulcni sadilas noc ,sadabargerp satnic ed adatimili isac acetoilbib anu ranoicroporp arap etneicifus odis rebah a rdop orenid le s; medA .atnic ed rodabarg nu noc otluda otniuq adac a odanoicroporp rebah a rdop anitaL acir AmA adot ne n isivelet ed senoicalatsni ne odata aroha orenid IE ...azna± esne al y ejazidnerpa le arap sedadinutropo ed dadlaugi al ridnufid arap oda± esid y ocilb Ap le arap selbinopsid etnemlic; f ,seder saveun nos atisecen es euq oL  n icapucoerp amsim al rop sodavitom sorto noc lautca n icapucoerp us ritrapmoc ed dadinutropo amsim al erbmoh adac a areid euq oicivres o der anu a res aleucse al a lacidar s; m avitanretla aL  latigid-erp tenretni nu noc etnemlaicnese egrus y rap a rap ed y odigiridotua ,etneidnepedni ejazidnerpa nu natimrep euq sametsis ribircsed atnetni hcillI ,sotnup soirav nE .an iccurtsni al ed odatluser le se on ejazidnerpa ed a royam aL  ,euq amix; m elpmis al se orbil le odot a lartneC .tenretnI ed are al ne hcillI ed sisil; n ed safirat sal om Ac raredisnoc etnanicsaf se euq oerc ,orbil led siset al odicejevne ah om Ac a odnaznavA .riced obed ,dadeicos al ralocsedes erbos otroc orbil nu ne etropsnart led odic Al nat sisil; n nu rartnocne abarepse oN .sotelpmoc sotsag sol ragarfun nadeup soirausus euq ed n icnetni al noc odalugersed ah es ocilb Ap n icnevbus emrone al nereiuquer etropsnart ed sadavirp sedadiladom sadamall sal euq etropsnart ed acit lop lautca al ed latnemadnuf ajodarap anu odneis eugiS .yrrU ed "dadilivomotuA ed ametsiS' al ed a roet al ed nemuser nu eneit y etnemaregil ofarr; p ese ne amodi le ecilauctA .eteuqap le odot ne dadeicos al "ranag" se ocis; b otcudorp le rednev y ,ocis; b otcudorp led n icarobale al rop odatcid se otnemele adac ed otsoc otla IE .ahcered ed senoicutnsi ed opurg nu ed ortnec le se odavirp ehcoc IE :n iserpixe ed datreibl al ed dadinutropo al a recoerFO .n isivelet ed der lautca al ed etnemlacidar a res ,otsepus rop ,atnic ed serodabarg ohceh ah ,adud nis ,tenretnI .ohcepsos euq sisafn  lat a raborpa on hcillI ;larobal odacrem le arap etnaveler s; m zev adac se euq dadilibah anu ed ocif cepse osac le olos se etse ,etrap arto roP ?etneg reconoc arap oideM omoc lit  se olos osecorp le y oditnes a net on solut  sortseun ed odinetnec le euq )rodacifidoc ogima nu eneitsos omoc( osac le se O;  ?airatisrevinu n icaticapac artseun a saicarg odigiridotua ejazidnerpa le arap tenretnI rasu ed secapac s; m somos euq ed osac le sE;  .soiratisrevinu sodaudarg sodoT somos oy y sogima sim ,ograbeM niS .otulosba ne lamrof n iccurtsni noc ,odarotcod im etnarud sacits dase arap R rasu arap adatimil n icacifidoc anu @ ± esne em ,ohceh eD .atcadidouta se salle ed anu adac ,@ s oy ednod atsah ,y ,serodacifidoc omoc soiralas soneub yum nanag euq sanosrep sairav nartneucne es datsima ed opurg im ertnE .saicnednet artnoc sasoredop nos lanoicnevoc n icacude al rop otluco y olelarap ,odal orto roP .roirepus omoc aleucse al otnat ,n icacude al ed n icazilaicremoc al noc odatnemua ah olos nemaxe led sodatluser sol ed ocim tot redop le ,ohceh eD .abarepse omoc odathcram nah es on saleucse sal ,etnemaibO .ranoicroporp odeup euq sal ed sadnuforp s; m ohcum satseupser ed angid etnanicsaf atrugerp anu ecerap em otsE ?saicneucesnoc sal erbos saedi sus neneitnam es om Ac;  ,sejavlas s; m senoicanigami sus ed ; lla s; m odargol nah es hcillI ed n inipo ed oibmacretni le y n icamrofni ed dadilibinopsid al ed n isiv al euq odad ,secnotnE !rigiridotua ed lic; f y odip; r ejazidnerpa nu arap tenretnI ed laicnetop le etnemaralc artseumed adepikiW erbos acits datse al euq @ rtnocne euq ed ohceh IE;  .n icacude al ed %04 le rop adazilitu se y etsixe der lat ed asoredop etnemadamertxe n isrev anu sa d sotse ne ,tenretnI a osecca neneit sodoT arenam anugnin ed euqnuA .senoinipo sus riteper y ridnufid ,ravreserp ,rartsiger na rdop laugi rop sotebaflana soL It is much more fun to learn hobby and hobby -type skills, such as instruments, weaving and cooking techniques.
