Fire Evacuation Procedure

Premises Address: _____
 Contact Number: _____
 Plan Date: _____
 Review Date: _____

This plan outlines the action to be taken in the event of a fire and sets out the procedure for this building / site. It has been developed following a fire risk assessment and is applicable to both regular building users and occasional visitors.

The purpose of the procedure is to:

- ensure the safety of all persons in the event of a fire
- ensure compliance with the Regulatory Reform (Fire Safety) Order 2005
- ensure adherence to official guidance and relevant standards

All staff are familiarised with the fire evacuation procedure through regular fire drills. Copies of this procedure will be made available to any person on request.

Information and instructions are conveyed through introductory talks and fire action notices.

A plan showing fire escape routes and assembly point will be displayed on the notice board.

Responsibility

Responsible Person: _____
 Fire Marshal: All supervisors

Responsible Person

In the event of a fire evacuation procedure, the responsible person will ensure that the plan is followed and that staff are trained on the evacuation plan and there are sufficient staff on hand to carry out the evacuation plan.

Fire Marshals

Fire marshals (under the control of responsible person) have the following duties:

1. Checking that each designated area is clear of all personnel
2. Closing doors if safe to do so

OFFICE EMERGENCY ACTION PLAN §3220

OVERVIEW OF OPERATIONS AND RESPONSIBILITIES

Fill in company's name will operate and maintain its locations in a way that reduces the possibility of accidents. To achieve this goal, every employee shall become familiar with the proper use, storage, and handling of flammable, combustible, and hazardous materials and shall follow appropriate work practices.

In the event of an incident, employees will follow the procedures outlined in this plan.

Training of Employees 3220 (e)(1), (2), & (3)

Employees will receive training on fill in company's name Emergency Action Plan as part of the new hire orientation session/meeting. This will include specific training for those key persons responsible for evacuating employees. Completion of this training is documented on the Employee Orientation Checklist. Whenever the Plan is revised or updated, all affected employees will receive refresher training. This refresher training is also documented.

Emergency Coordinator 3220 (b)(6)

The Emergency Coordinator is responsible for coordinating all emergency response actions at the specific location. He/she is familiar with the operations of the business and has full access to all areas at the location. In addition, he/she has the authority to make decisions during an emergency and will be available on a 24-hour basis. The Alternate Coordinator will work in conjunction with the Emergency Coordinator or on his/her behalf.

Location: Office

Emergency Coordinator: _____

Alternate Coordinator: _____

The address and telephone number of these organisations can be found in the telephone directory, listed under the appropriate disability.Â You must take account not only of the people in your premises (employedÂ Aor otherwise) who may be able to make their own escape, but also those who may need assistance to escape, e.g. by having adequate staffing levels, especially in premises providing treatment or care. They could include schematic drawings and most importantly emergency escape and exit signs. Because of the extra time this type of evacuation takes, other fire precautions may be required. They should be competent in the use of fire extinguishers and be capable of extinguishing small fires. As mentioned earlier there should be a senior person nominated to meet the fire and rescue service when they arrived to provide them with any information they require. The need for fire wardens depends on the size and complexity of the premises. She/he should have an intimate knowledge of the premises and be in contact with the person conducting the roll call at the assembly point. Depending onto the fire situation it may eventually be necessary to consider vertical evacuation. This is known as a simultaneous evacuation and will normally be initiated by the sounding of the general alarm over the fire warning system. The assembly point should be far enough away from the building not to put staff in danger of radiated heat and falling debris. The assembly point should not be in an enclosed area and the staff should be able to disperse without the need to pass close to the premises on fire. It is also very important to be familiar with the surrounding topography. In some larger complex premises, the emergency arrangements are designed to allow people who are not at immediate risk from a fire to delay starting their evacuation. DO NOT PUT ANY PERSONS AT RISK. This could be talking to him direct or the use of runners or electronic communications (pack sets, mobile phone) The area chosen should be larger enough to accommodate all the staff, if this cannot be found you may have to consider additional sites. The general term used for these people are fire wardens or fire marshals. You are required to carry out this fire training and it is recommended that you keep a record of the results of that training. Training required The emergency evacuation plan should be the subject of frequent training so that all employees are familiar with its contents and there should be regular evacuation drills. Staff Fire Notice High fire risks or large premises will need more detailed emergency evacuation plan which takes account of the findings of the fire risk assessment, the staff significantly at risk and their location. Pre-determined assembly points should be arranged and a roll-call of staff to be taken. In the case of patients connected to life supporting equipment a decision has to be made which option is the best, stay or move, either way the patient would be at serious risk. Action on hearing the fire alarm On discovering a fire, it is the duty of every person to sound the nearest fire alarm immediately. Finally they should have an in depth knowledge of the FEEP and their role in implementing it. The person who is in charge of the assembly point should report to the person who as been nominated the fire service liason person indicating all persons accounted for or whose missing and where they were last seen. Calling the fire brigade The Fire Service should also be informed immediately, either by switchboard operator or person discovering fire, dependant on conditions. Work Time eAAA Switchboard operator to be familiar with the emergency evacuation plan, also should ensure necessary extensions switched through when switchboard is unattended. Fire Wardens/Marshals should be responsible for Fire and evacuation drilling procedures guarantees personnel know the position of fire alarm points to ensure regular use of primary and secondary escape routes the close procedure procedure for appointed personnel to assist employees and public members at the outputs closest to Extixture Pets responsible for ensuring that communications are properly positioned, the fire emergency evacuation plan is correctly distributed and understood by everyone. He / she should have a nominated deputy. Calculate the number of staff that would need to assemble it and if it is a multi-busy building that you need to cooperate with other occupants. They also require special training above the needs of the normal employee, this training could be at home or by an external fire-fighting training organization. The concept allows the occupants to remain put and allow the fire service to turn off the fire. Another consideration when selecting the position for an assembly point is fully understood the evacuation plan of the fire emergency. Defending in position This strategy can be taken into consideration in blocks of apartments were all apartments is a minimum compartment of 60 minutes of fire resistance. In most cases it is necessary to appoint people to implement the fire action plan and give them adequate training in fire prevention and evacuation procedures. Be close enough to ensure that the appointed person who is responsible for the assembly point can communicate with the aforementioned fire connection person who should be near the main entrance. The staff should not re-enter the building with the possible exception of the fire-fighting team. Liaison with emergency services it is necessary to prepare all the necessary contacts with external emergency services and make them familiar with the fire action plan. Following the staff alarm, it can be given a more general alarm signal and simultaneous or gradual evacuation has begun. The inclement time must be considered and some form of shelter or other weather protection could be needed as the staff is more likely to have evacuated without collecting their outdo clothes. You can include any relevant information in relation to the shore. PROCEDURE AT THE FOOD PROCESS / PROCESS LISTENED PROCEDURE - adopts your procedure for the procedure of the procedure as a person ingranged to identify the prohancies of key fires in premises where members of public puppy or pigsters with the work of those present means available for Identify the key routes of escape. Itineraries.

11/2/2022 · London Plan Policy D12 on fire safety requires all developments to achieve the highest standards of fire safety. Major developments are required to submit a Fire Statement. London Plan Policy D5 requires developments that include a lift core to include at ... 23/7/2018 · Improve your fire evacuation procedures to better support low-mobility service users and other vulnerable people in the home. Reorganise the care home to improve safety. For example, you could shorten the distance staff have to travel when carrying out manual handling activities. Look at ways to improve your infection control processes. A comprehensive investigation plan should be created before beginning a new investigation. It's the best way to ensure the investigation stays on track and keeps everyone accountable and following a logical process. Use this detailed investigation plan template to ensure your next investigation starts off on the right foot. Login to the Handsam System here. To LOGIN to the Handsam system click on the relevant logo below. If your organisation's logo does not appear here then please click on the EdSafe logo. A fire alarm system warns people when smoke, fire, carbon monoxide or other fire-related emergencies are detected. These alarms may be activated automatically from smoke detectors and heat detectors or may also be activated via manual fire alarm activation devices such as manual call points or pull stations. Alarms can be either motorized bells or wall mountable ... 1/4/2022 · The Home Office has introduced a new Fire Safety Bill, in an effort to improve fire safety in buildings in England and Wales. Set to amend the Fire Safety Order 2005, the bill has been designed to "ensure that people feel safe in their homes, and a tragedy like the Grenfell Tower fire never happens again". 1/12/2021 · The emergency fire evacuation plan to ensure everyone leaves the property quickly and safely; ... Fire risk assessment template and tools for holiday home owners. ... Did you know many fire and rescue services in the UK offer a free visit to identify the potential risks of fire in your holiday property. A fire alarm system warns people when smoke, fire, carbon monoxide or other fire-related emergencies are detected. These alarms may be activated automatically from smoke detectors and heat detectors or may also be activated via manual fire alarm activation devices such as manual call points or pull stations. Alarms can be either motorized bells or wall mountable ... If you are a employer, owner or occupier of premises that aren't a 'single private dwelling' (a private home), it's your responsibility to keep people safe if there is a fire. Though prevention is always best, you are also required by law to make a detailed fire emergency plan so your people can keep themselves and members of the public out of danger. Fire safety is a vital part of managing flats or apartments, all landlords or building management companies must comply with legislation which states a Fire Risk Assessment of all communal areas is a legal requirement to identify the risks and also to ...
